Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the latest month end is available at <https://www.flexshares.com/us/en/individual/funds>. It is not possible to invest directly in an index.

FlexShares shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm EST Net Asset Value. Beginning July 1, 2024, market price performance is determined using the closing price on the primary exchange. Prior to July 1, 2024, market price performance was determined using the bid/ask midpoint at 4:00pm EST, when the NAV is typically calculated. Market price returns do not represent the returns you would receive if you traded shares at other times.

Foreign Securities Risk is the risk that investing in foreign (non-U.S.) securities may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to less liquid markets and adverse economic, political, diplomatic, financial, and regulatory factors. **Authorized Participant Concentration Risk** is the risk that the Fund may be adversely affected because it has a limited number of institutions that act as authorized participants. **Market Trading Risk** is the risk that the Fund faces because its shares are listed on a securities exchange, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. ANY OF THESE FACTORS MAY LEAD TO THE FUND'S SHARES TRADING AT A PREMIUM OR DISCOUNT TO NAV.
